

The **South Asian Journal of Mathematics** (SAJM) is a peer-reviewed international journal. The journal publishes significant research papers from all branches of mathematical sciences and their applications in other scientific disciplines. The prestigious interdisciplinary editorial board reflects the diversity of subjects covered in this journal, including set theory, model theory, algebra, group theory, number theory, analysis, functional analysis, ergodic theory, algebraic topology, geometry, combinatorics, computer science and applications, mathematical physics, applied mathematics, theoretical and applied statistics. It provides authoritative reviews of current developments in mathematical sciences research. Contributions are invited from researchers all over the world. One volume of six issues is published annually.

FOR AUTHORS: To submit a paper for publication, we warmly welcome the manuscript in a widely acceptable format (PDF preferred) is sent via email sajmeditor@gmail.com to the editorial office. Also an author may send an electronic file of the manuscript to the Editorial Editor at the e-mail address on the home page. Acknowledgement of the paper should occur within a week. The submission of a paper implies the author's assurance that it has not been copyrighted, published, or submitted for publication elsewhere. All authors of papers accepted for publication will be required to sign a transfer of copyright agreement.

Authors should strive for expository clarity and good literary style. Manuscripts lacking in these respects will not be published. Preference will be given to manuscripts between four and forty pages in length. Manuscripts submitted for publication should be neatly typed on one side of the page only, double-spaced (including references), with generous margins. Hand-inserted symbols should be well spaced and legible; unusual symbols and complicated combinations of symbols should be avoided. The abstract and standard MSC 2010 should be included. References to articles and books should be in the standard form with the standard abbreviations established by Mathematical Reviews, and should be listed in alphabetical-chronological order. Upon acceptance of a paper, the author will need to supply an electronic version of their manuscript. The paper should still be double-spaced, and sent either on a disk, or via electronic mail. The file will need to be in a **TeX/LaTeX/AMS-TeX** file (AMS-TeX preferred). Please indicate which versions of TeX you used, and what operating system has been used to create the diskette. Please include all figure files and any macro files used in the paper. Once published, author(s) will receive a PDF file of the final printed version of their article.

MANUSCRIPT CHARGES: There is no charge for the publication of papers but author(s) of each accepted paper is required to pay an online maintenance/processing fee of \$100 (100 USD), before the accepted paper is published.
